EDUCATION

B.Tech in Computer Science & Engineering

GL Bajaj Institute of Technology & Management, Greater Noida

2024 – 2028

Senior Secondary (CBSE – Science)

KT Public School, Faizabad — 92.40% | 2024

Secondary (CBSE)

Udaya Public School, Faizabad — 96.00% | 2022

TECHNICAL SKILLS

Programming Languages: Java, C, C++

Web Technologies: HTML, CSS, JavaScript

Concepts: Data Structures & Algorithms, Object-Oriented Programming

Tools: Git, GitHub

Other: Research & Analytical Thinking

PROJECTS

Real-Time Low-Voltage Line Fault Detection System

Technologies: C++, NodeMCU, HTML, CSS, JavaScript

- Developed a real-time system to detect faults in AC power lines using NodeMCU and C++ logic.
- Implemented algorithms to identify line breakage and trigger alerts in real time.
- Built a web dashboard for live monitoring and visualization of power line status.
- Optimized detection logic reducing fault identification time from hours to under 5 seconds.

BlackBoxCV – Resume Screening Analyzer

Tech: Python, Streamlit, Sentence Transformers

- Built a tool that simulates automated resume screening used by recruiters.
- Extracts and evaluates skills using NLP-based similarity scoring.
- Helps students understand how resumes are evaluated beyond keywords.

PROBLEM SOLVING

- Practicing Data Structures and Algorithms using Java
- Currently studying DSA concepts including arrays, hashing, recursion, and sorting algorithms
- Actively solving coding problems to strengthen algorithmic thinking

EXTRA CURRICULAR

- Participated in multiple school and district level debates and extempore competitions
